**Subject:** NFB AC Issue

Eric,

FYI - While up at NFB today, John from Niagara Building Center stated to me that the facility AC was out and wondered if there was anyway it was associated with the work that we had completed last week. Understanding that you are in training the next couple of days, I contacted Kevin Shaver directly to discuss. According to Kevin, all systems were operational when we left last Thursday. Kevin contacted John to ensure him that the work that we had completed should not have interfered with the HVAC system. Kevin had me check the multiple thermostats at the facility to see if the movement of one unit may have triggered the issue. Both units appear to be functioning correctly. John said that he would check the AC unit itself on the rooftop when time allows.
